## **Executive summary**

IAB Europe (Transparency Register: 43167137250-27) is the European-level association that represents the broad digital advertising and marketing ecosystem, with 25 national associations whose 5000+ members include advertisers, agencies, publishers, and technology companies.

IAB Europe understands the complexity of combating disinformation and recognizes its importance for the digital ecosystem to continue offering reliable information. This is in the best interest of all parties involved, as access to truthful information promotes confidence in the digital space and benefits the overall health of the digital ecosystem.

The Association and a number of its members were original signatories of the first Code in 2018. Since then, IAB Europe, in its role as a trade association signatory, has been promoting the Code within the industry and advocating for ongoing collaboration on it throughout the digital ecosystem.

After the signing of the 2022 CoP, IAB Europe participated in the post-signing activities of the Taskforce Group and became part of the Ad Scrutiny, Monitoring and Reporting, and Outreach and Integration Subgroups of the Taskforce. In those, the association has shared the point of view from the digital advertising ecosystem when needed.

On October 24, 2024, IAB Europe organised the event "IAB Europe's European Elections: Rights and Risks in the Digital Public Space." During this gathering, we delved into the complex landscape of the digital public space, examining the rights and risks it presents while assessing how European policymakers are responding. This event, consisting of two-panel discussions, included a session that explored the challenges in the digital public space with a focus on disinformation and media literacy. The discussion was held among representatives of a fact-checking organization (Maldita.es), a media agency (GroupM), and an EU official from the EEAS. Panellists discussed the importance of fighting disinformation and supporting quality media.

In this annual report, IAB Europe, in its role as a trade association, reports on its continuous engagement in the Taskforce Subgroups and its support of actions to accomplish the commitments within its areas of expertise.

IAB Europe will continue to educate the industry on the significance of the CoP and its commitments to maintaining a digital space that offers accurate information and viewpoints that are accessible and affordable to all citizens.

## Guidelines for filling out the report

Reports are detailing how signatories have implemented their Commitments under the Code and signatories commit to provide regular reporting on Service Level Indicators (SLIs) and Qualitative Reporting Elements (QREs). The reports and data provided should allow for a thorough assessment of the extent of the implementation of the Code's Commitments and Measures by each signatory.

#### Reporting period

The reporting period to be covered in the reports is from 16 January 2023 to 15 March 2024 for signatories who are not offering very large online platform services. Signatories shall submit reports outlining policy updates and actions taken to implement the Commitments and Measures they signed up to under the Code. All data and policy updates should be reported for 12 months period from the submission of last reports.

#### Adjusting the reporting template

Signatories who are not offering very large online platform services can adapt the template to specific commitments and measures they subscribed to. This may include adapted wording for commitments, measures, QREs and SLIs. Relevant signatories will report only on commitments and measures they subscribed to and provide Member State-level data only if feasible.

#### Reporting per Service

When filling in a report for several services, use colour codes to clearly distinguish between services. At the beginning of the report, clarify what colour is used for which service.

#### Reporting in text form

Reporting in the form of written text is required for several parts of the report. Most of them are accompanied by a target character limit. Please stick to the target character limit as much as possible. We encourage you to use bullet points and short sentences. When providing information to the QRE, please make sure that your answer covers all the elements of the associated commitment and measure. Links should only be used to provide examples or to illustrate the point. They should not be used to replace explanations or to provide data in the forms. All relevant explanations and data must be included in the report directly, in written form.

#### Reporting SLIs and data

Reporting on SLIs requires quantitative information to be reported on in this harmonised reporting template.

- Where relevant and feasible, SLIs should be reported on per Member State.
- If no data is available on Member State level, SLIs might, instead, be exceptionally reported on per language. (NB that signatories agreed to revisit this issue after the first reporting, to ensure harmonised and meaningful reporting.)
- Please report data in the format provided by the harmonised reporting template, not through external links. Please use the Member State/language template provided in the harmonised reporting template. Where the table asks for "Other relevant metrics", please name the metric that you would like to report on in addition to the ones already provided. You may include more than the number of additional fields provided where necessary; in that case, please adjust the table as needed.
- Please contextualize all data as much as possible, i.e. include baseline quantitative information that will help contextualize the SLIs (e.g. number of pieces of content labelled out of what volume of content).
- If there are no relevant metrics to report on, please leave the respective columns blank.

### Reporting on TTPs

If subscribed to Commitment 14, Integrity of Services, we ask you to report on each identified TTP individually. The number of identified TTPs may vary per service. Where more than one TTP are reported under the same action, clarify the reasoning in the methodology. Where input is not provided, keep the placeholder for the relevant TTP and explain reasons and planned remedial action. Additionally, as with all other SLIs, data can be provided per Member State for each individual TTP.

#### **Missing Data**

In case that at the time of reporting there is no data available yet, the data is insufficient, or the methodology is lacking, please outline in the dedicated field (i.e. in the field about further implementation measures planned) how this will be addressed over the upcoming six months, being as specific as possible.

Signatories are encouraged to provide insights about the data/numbers they provide by inserting possible explanations in the boxes of the template "Methodology of data measurement & insights on data provided". This should aim to explain the why of what is being reported, for instance - Are there trends or curiosities that could

require or use contextual explanation? What may be driving the change or the difference in the number? Please also indicate inconsistencies or gaps regarding methodology in the dedicated box.

#### **Attachments**

We ask you not to enclose any additional attachments to the harmonised reporting template.

#### Crisis and elections reporting template

Relevant signatories are asked to provide proportionate and appropriate information and data during a period of crisis and during an election. Reporting is a part of a special chapter at the end of the harmonised reporting template and should follow the guidelines:

- The reporting of signatories' actions should be as specific to the particular crisis or election reported on as possible. To this extent, the rows on "Specific Action[s]" should be filled in with actions that are either put in place specifically for a particular event (for example a media literacy campaign on disinformation related to the Ukraine war, an information panel for the European elections), or to explain in more detail how an action that forms part of the service's general approach to implementing the Code is implemented in the specific context of the crisis or election reported on (for example, what types of narratives in a particular election/crisis would fall into scope of a particular policy of the service, what forms of advertising are ineligible).
- Signatories who are not offering very large online platform services and who follow the invitation to report on their specific actions for a particular election or crisis may adapt the reporting template as follows:
  - o They may remove the "Policies and Terms and Conditions" section of the template, or use it to report on any important changes in their internal rules applicable to a particular election or crisis (for example, a change in editorial guidelines for fact-checkers specific to the particular election or crisis)
  - o They may remove any Chapter Section of the Reporting Template (Scrutiny of Ads Placement, Political Advertising, Integrity of Services etc.) that is not relevant to their activities
- The harmonised reporting template should be filled in by adding additional rows for each item reported on. This means that rather than combined/bulk reporting such as "Depending on severity of violation, we demote or remove content based on policies X, Y, Z", there should be individual rows stating for example "Under Policy X, content is demoted or removed based on severity", "Under Policy Y, content [...]" etc.
- The rows should be colour-coded to indicate which service is being reported on, using the same colour code as for the overall harmonised reporting template.

Reporting should be brief and to the point, with a suggested character limit entry of 2000 characters.

#### Uploading data to the Transparency Centre

The reports should be submitted to the Commission in the form of the pdf via e-mail to the address CNECT COP TASK FORCE <a href="CNECT-COP-TASK-FORCE@ec.europa.eu">CNECT-COP-TASK-FORCE@ec.europa.eu</a> within the agreed deadline. Signatories will upload all data from the harmonised reporting template to the Transparency Centre, allowing easy data access and filtering within the agreed deadline. It is the responsibility of the signatories to ensure that the uploading takes place and is executed on time. Signatories are also responsible to ensure that the Transparency Centre is operational and functional by the time of the reports' submission that the data from the reports are uploaded and made accessible in the Transparency Centre within the above deadline, and that users are able to read, search, filer and download data as needed in a user-friendly way and format.

## II. Scrutiny of Ad Placements

### Commitment 1

Relevant signatories participating in ad placements commit to defund the dissemination of disinformation, and improve the policies and systems which determine the eligibility of content to be monetised, the controls for monetisation and ad placement, and the data to report on the accuracy and effectiveness of controls and services around ad placements. This additional Service Level Indicator provides an estimated financial value of the actions taken by Signatories to demonetise disinformation sources (under SLI 1.1.1). It is based on media metrics available to Signatories (query/bid¹ or impression²) and applying an agreed-upon conversion factor provided by a third party designated by the Task-force of the Code (Ebiquity plc.).

## II. Scrutiny of Ad Placements

## Commitment 3

Relevant Signatories involved in buying, selling and placing digital advertising commit to exchange best practices and strengthen cooperation with relevant players, expanding to organisations active in the online monetisation value chain, such as online e-payment services, e-commerce platforms and relevant crowd-funding/donation systems, with the aim to increase the effectiveness of scrutiny of ad placements on their own services. [change wording if adapted]

<sup>1</sup> Request placed between a seller and buyer of advertising that can detail amongst other things website, specific content, targeting data inclusive of audience or content.

<sup>&</sup>lt;sup>2</sup> Comprehensive calculation of the number of people who have been reached by a piece of media content by passive exposure (viewing a piece of content) or active engagement (visiting a destination).

| Measure 3.2                           | [insert wording if adapted]  |
|---------------------------------------|--|
| QRE 3.2.1 [insert wording if adapted] | Outline relevant actions [suggested character limit: 2000 characters] Part of the IAB Europe's mission is to promote industry collaboration and share best practices. The Association is a relevant forum to facilitate exchanges amongst market players, building on existing discussions with members, including those related to brand safety, transparency and quality. IAB Europe is committed to keep supporting industry exchanges within the remit of the CoP and remains committed to this in the future. IAB Europe organised an event on October 24, 2024, titled "IAB Europe's European Elections: Rights and Risks in the Digital Public Space," featuring a panel that discussed the "Challenges Posed by the Digital Public Space." The panel discussion provided an opportunity for relevant players in the advertising value chain, such as media agencies, to share their best practices on scrutinising ad placements and ultimately ensuring brand safety. |

| QRE 37.6.1 [insert wording if adapted] | Outline relevant actions [suggested character limit: 2000 characters] IAB Europe participated in the Ad Scrutiny Subgroup, the Monitoring and Reporting Subgroup and the Outreach and Integration Subgroup. |

## X. Monitoring of Code

## Commitment 39

Signatories commit to provide to the European Commission, within 1 month after the end of the implementation period (6 months after this Code's signature) the baseline reports as set out in the Preamble. [change wording if adapted]

### X. Monitoring of Code

### Commitment 40

Signatories commit to provide regular reporting on Service Level Indicators (SLIs) and Qualitative Reporting Elements (QREs). The reports and data provided should allow for a thorough assessment of the extent of the implementation of the Code's Commitments and Measures by each Signatory, service and at Member State level. [change wording if adapted]

| Measure 40.5 | [insert wording if adapted] |
| Measure 40.6 | [insert wording if adapted] |

## X. Monitoring of Code

### Commitment 41

Signatories commit to work within the Task-force towards developing Structural Indicators, and publish a first set of them within 9 months from the signature of this Code; and to publish an initial measurement alongside their first full report. To achieve this goal, Signatories commit to support their implementation, including the testing and adapting of the initial set of Structural Indicators agreed in this Code. This, in order to assess the effectiveness of the Code in reducing the spread of online disinformation for each of the relevant Signatories, and for the entire online ecosystem in the EU and at Member State level. Signatories will collaborate with relevant actors in that regard, including ERGA and EDMO. [change wording if adapted]

| Measure 41.2 | [insert wording if adapted] |
| Measure 41.3 | [insert wording if adapted] |

## X. Monitoring of Code

### Commitment 42

Relevant Signatories commit to provide, in special situations like elections or crisis, upon request of the European Commission, proportionate and appropriate information and data, including ad-hoc specific reports and specific chapters within the regular monitoring, in accordance with the rapid response system established by the Taskforce. [change wording if adapted]

## X. Monitoring of Code

### Commitment 43

Relevant Signatories commit to provide, in special situations like elections or crisis, upon request of the European Commission, proportionate and appropriate information and data, including ad-hoc specific reports and specific chapters within the regular monitoring, in accordance with the rapid response system established by the Taskforce. [change wording if adapted]
