Listen Up!
The Rise of Digital Audio Advertising

Dr Daniel Knapp
Chief Economist, IAB Europe

18th September 2019
Welcome to The IAB Europe Economic Trends Forum

- New IAB Europe format
- Every 8 weeks – physical location
- Quantitative & qualitative trends analysis on factors impacting digital advertising
- Future topics will include:
  - Digital Out of Home
  - Connected TV
  - Artificial Intelligence
  - Bi-Annual Macroeconomic Outlook & Ad Forecasts
  - Please feel free to suggest topics of interest!

Dr. Daniel Knapp, Chief Economist, IAB Europe
Listen Up! The Rise of Digital Audio Advertising
Excavations of the future as seen in 1922

“The president of the Ultra National Bank removes a small rubber disk from his vest pocket and places it over his ear. A moment hence, he will receive by radiophone the financial news of the world. Simultaneously, millions of other people all over the globe will receive the message. At designated hours, news of a general character will also be received. The broadcasting of news by radiophone had long displaced the daily newspaper[...].”

(Radio News, March 1922)
Excavations of the future as seen in 1922

“Seated comfortably in the club car of the Twenty-first Century Flyer — fast airplane service between London and New York — the president of the Ultra National Bank removes a small rubber disk from his vest pocket and places it over his ear. A moment hence, he will receive by radiophone the financial news of the world. Simultaneously, millions of other people all over the globe will receive the message. At designated hours, news of a general character will also be received. The broadcasting of news by radiophone had long displaced the daily newspaper [...]”

(Radio News, March 1922)
Radio was the internet of the 1920s-30s: rapid ad growth & talk of ‘disruption’

US ad spend growth (current prices)

Source: Robert J. Coen (formerly McCann Erickson)
According to most records, the first radio ad (officially) was developed by the WEAF organization in America, by AT&T. In 1922, the group offered businesses a chance to appear on their radio station in exchange for a fee of $50 – plus long-distance access fees. The first sponsor to take advantage of the deal was the Queensboro Corporation of New York, who used their advertisement to sell real estate.

**TECHNOLOGY**

The First-Ever Banner Ad on the Web

It was an advertisement for AT&T in 1994, and people clicked on it like crazy.

Total digital ad market in Europe

Europe: Total digital ad spend split (2018)

- Total: 100.0%
- Search: 45.3%
- Classifieds & Directories: 12.5%
- Total Display: 42.2%
- Social Display: 20.9%
- Non-Social Display: 21.3%

Source: IAB Europe AdEx Benchmark 2018 Study

Total digital ad spend in Europe: €11.7bn
Digital audio ads to become a €1.5bn market

- Growth driven by podcasts, music streaming services, digital/online radio from 'legacy' radio firms.
- Smart speakers have no direct impact on growth yet but drive awareness of voice.
- Radio Apps in smart speakers will become significant growth driver.
- Log-in based streaming services have advantage due to tracking & attribution.
- Radio marketers forming alliances & investing in data pools.
- Around 80% of revenue is mobile.

Sources: Company reports, RadioCentre, own model, updated in September 2019 to reflect additional streaming services and new country data

*Audio ad formats only - excludes banner & video ads sold against audio content
CPMs indicate value of audio, but also still nascent market

*based on buyer feedback in Germany and the UK
4 factors underpin renaissance of audio

Quality and Trust: premium environment with low risk of fraud and a high degree of transparency.

Control: Many premium sellers operate only via private marketplaces.

Share of Voice: Most audio environments—particularly on mobile devices—offer brands 100 percent share of voice in a one-to-one setting.

Data-Driven Creative: streaming audio subscriber data paired with emerging dynamic creative solutions allow data-driven storytelling.
Some existing hurdles removed

1. Change in buying responsibility

   Broadcast & analogue teams

   Programmatic & digital media teams

2. Standardisation

   DAAST & VAST

   Single marketplace through VAST 4.1
New VAST 4.1: connecting audio ads to other media forms

Source: Spotify
Dynamic creative: personalisation is fast & cost-effective

Travel campaign: 12,500 ads

Source: A Million Ads via Earshot Creative
What about programmatic? Strong sector activity: pipes are being laid. Yet market too nascent to be sized accurately.

Note: Not exhaustive. Aim is to demonstrate variety of activity for ecosystem building.
Digital audio in context: hype vs reality

Europe: Digital audio spend in context (2018, EURm)

• Despite fast growth and a vibrant ecosystem: digital audio market is still very small, ~3% of display market (excl. social)

• Programmatic so early at scale that is is hard to measure

• Benchmark: 25% of Spotify’s global ad revenue ($291m in H1) is programmatic

• Estimated Spotify programmatic revenue for FY 2019: $150-160m

• But this is across display, video, audio

Source: IAB Europe
Limitations need to be overcome to unlock programmatic audio

1. Explosion of engagement with digital audio content, but ad-funded model has not grown at same speed

2. Underlying programmatic infrastructure was not built for audio. New native tech and adjustments required, esp. for seamless ad insertions.

3. Limited return-path data, analytics & measurement, esp. on podcasts.

4. Lack of scale: Specific audiences are already hard to find at scale in audio per se. Even more limited in programmatic, which hampers ability of campaigns to be fulfilled.

5. Crucial podcast market differentiates through ‘native’ ads (e.g. host-read) – this requires programmatic models that focus on workflow automation instead of RTB.

6. Fragmented inventory outside of major streaming platforms.

7. True power of audio is not as stand-alone channel, but in integration with other programmatic channels (display, video). Increases complexity, skill requirement and reduces pool of buyers (omnichannel responsibility).

8. Education audio-specific metrics required (e.g. listen-through rate, mute rate).
“We want to acquire more, and have line-of-sight on total spend of $400-$500M on multiple acquisitions in 2019.”
Spotify SEC filings, FY 2018

Deal value 2019 so far

$154m (Anchor)  
+$195m (Gimlet)  
+$55m (Parcast)  

=$404m
US with Apple dominance is the battleground which will also affect the European market.

US: Podcast player market share 2018

- **Apple**: 60.9%
- **Stitcher**: 2.0%
- **Castbox**: 2.4%
- **Overcast**: 3.1%
- **Spotify**: 8.5%
- Other: 23.1%

**Battle for market share gains**

- Apple engrained with podcast platform natively installed in iOS
- Development of original productions (e.g. Spotify deal with Amy Schumer)
- Scale through third party platforms
- End-to-end lifecycle for producers & owners

73.7% ad revenue captured in 2018
“We’ve had a pretty significant number of brand advertisers reach out […] What they’ve said is, ‘We like this space, we think it has our audience, it has enough reach; is there a way we can quantify whether the ads work?’ […] And the answer is, ‘Maybe.’”

Agency Executive

Over 80,000 Alexa skills worldwide

Number of Alexa skills by country (January 2019)

Source: voicebot.ai
Alexa: skill growth is both good and bad news: ecosystem growth, but discoverability impacted.

- **Av. daily skill additions**
  - USA: 80
  - UK: 60
  - Germany: 10

- **Skill count year-on-year growth**
  - UK: 233%
  - Germany: 157%
  - USA: 120%

Source: voicebot.ai
Emerging marketing strategy on voice assistants

**Voice direct**
- Branded skills
- ‘On assistant’ paid media (spots, sponsorships, promotions), e.g. via VoiceLabs
- Aural identity (e.g. earcons)

**Voice indirect**
- Continuous monitoring & intelligence
- Hijacks, Exploits

**Outside voice ecosystem**
- Trigger consumer actions on voice through off-voice brand advertising

**Underlying search engine (e.g. Google, Bing)**

**Store placement strategy (e.g. Amazon placement strategy)**

**Algorithms**
Reality check: for major players, the programmatic audio revolution will be part of the display & video world.

- Amazon Echo
- Amazon Echo Spot
- Amazon Echo Show
- Google Home
- Google Home Hub
- Watching radio
- Spotify annual results

“[…] our premium video offerings outpaced overall growth, growing 74% and reaching 29% of Ad-Supported revenue.”
Marketing is bigger than advertising, and voice applications reflect this
